DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-13 are allowed. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest the claimed invention.
- 2. Specifically, no teaching or obvious suggestion was found of the limitation "selecting a first ionic partner having an ionization potential within the range of ionization potentials; introducing the first ionic partner into the FT-ICR MS chamber; introducing the sample mixture into the FT-ICR MS chamber, whereby a charge exchange reaction takes place in the chamber between the first ionic partner and those components of the sample mixture having ionization potentials below the ionization potential of the first ionic partner, forming a first ionized mixture; and detecting the ionized components of the first ionized mixture in the FT-ICR MS chamber" as in claim 1. Claims 2-13 are allowed by virtue of their dependency.
- 3. US Pat No 4,613,755 issued to Hudgens teaches the knowledge in the art. Mainly, the mixing of gases with different ionization potentials in mass spectrometry (see the abstract). Hudgens fails to teach and/or suggest a FT-ICR MS chamber. The FT-ICR MS devices of the cited art fail

to or fairly suggest mixing two ionic partners as claimed. Also, applicant rightly points out the deficiency in the cited art; namely, the cited art does not teach or reasonably suggest a first ionic partner. Thus, the claimed invention is deemed patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
